Description

The Model TL7 is a panel mounted flashing alarm light and audible alarm driver. The TL7 helps protect the Murphy SWICHGAGE[®] contacts from the very high inrush current of the lamp. It is available in 12 or 24 VDC for negative ground systems. The SAH MINI-SIREN[®] provides an audible alarm when fault conditions are detected by a SWICHGAGE[®]. It can be panel mounted and operates on 6–28 VDC.

Application

The TL7 Flasher/Light is used as a warning device on various types of industrial and mobile equipment. The MINI-SIREN[®] will give an audible warning when the TL7 operates, or it can be wired directly to the SWICHGAGE[®] contacts for audible only alarm.
